

Engineering tomorrow's cement industry - from kiln to clinker - to be more **reliable, efficient and accurate**

**380 to
690 V**

full voltage range
of common DC Bus
products for both IM
and PM Motors

Right from blending to kiln and clinker store to the cement mill, every process is given precise control of power through the aid of Danfoss Drives. Undaunted of the difficult applications, dust and bad weather, the VLT® and VACON® range of AC Drives are the preferred choice to save energy and engineer a robust future.

VLT® | VACON®
