

Making in India. For India.

Explore the world of possibilities

With over 100 years of experience worldwide SKF has been a truly global company. In India we have been present for over 9 decades, with a strong manufacturing footprint to create local solutions for local requirements, specific to your industry.

SKF Solution factory

Provides integrated, value-added solutions, to solve a chronic equipment failure, or trying to reduce overall maintenance costs. Our growing network of Solution Factories provide services which include:

- Bearing remanufacturing
- Mechanical services
- Customized technical training
- Condition monitoring products and services

SKF Ahmedabad factory

Specializing in industrial solutions, the Ahmedabad factory products find application in the main shaft, gearbox and pitch and yaw for a wind turbine. Solutions include:

- Slewing bearings
- Spherical roller bearings
- Tapered roller bearings
- Cylindrical bearings
- Customization of bearings

Global Technical Centre India

SKF established Global Technical Centre India in Bangalore, in December 2011, reinforcing its global strategy to open Global Technical Centres to work closer with customers. GTCI supports customers in India and South East Asia, as well as global projects for SKF.

SKF Lincoln factory

Based in Bangalore, the factory is capable of producing solutions ranging from specialized lubricants to state-of-the-art centralized lubrication systems.
