INTRODUCTION:

Sanghvi Movers Limited has been providing crane rental services since 1985. At present, it is the largest crane rental company in Asia and is ranked seventh in the world. The company has a fleet of 400 medium to large sized heavy-duty hydraulic telescopic & crawler cranes with capacities ranging from 50 MT to 800 MT. The company has a registered office in Pune and more than 30 operational sites across India.

The company provides crane rental services to major heavy industries in sectors like Power (Wind, Thermal, Hydro & Nuclear Energy), Cement, Steel, Refinery and metro projects. It has also diversified the business in ODC transportation by adding special modular multi-axle trailers with around 150 new axle lines to its fleet. Today, Sanghvi Movers Limited is a major player in the project Heavy Lift & ODC transport.

ENGINEERING: COMPLETE LIFTING SOLUTIONS

We provide complete Lifting Solutions for Heavy Lift operations to be executed at the project site by our cranes thus adding value to our crane services. A full-fledged, in-house AutoCAD department at the company prepares a Heavy Lift Plan which our clients use as a reference while executing the job. They ensure that all lifts and transportation operations are performed according to the manufacturer's specifications and safety norms.

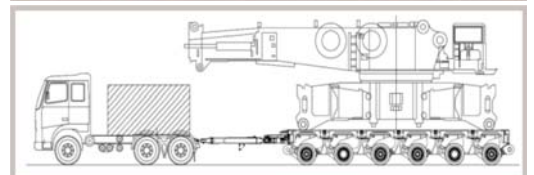

LOGISTICS:

Considering the large geography and different taxation laws from state to state, logistics is a challenging task in India. "Time is the essence of any contract" and we always remain committed to transport cranes to the project sites, safely and swiftly.

A fleet of 72 trailers is used exclusively for transportation of cranes to the projects sites. Recently, we added 150 brand new Axle Lines (Modular Multi-axle Trailers) for ODC transportation to its fleet. The company is now all set to undertake turnkey projects with transportation of heavy equipments and assembly of the equipments at the project sites using our cranes.
