

Geocycle...

...Your partner for sustainable waste management solutions

- A dedicated brand for offering waste management solutions to industrial and municipal waste generators
- Manages various types of hazardous and non-hazardous waste streams in a responsible, reliable and economically feasible way
- Offers responsible destruction of waste through co-processing – a cement kiln based technology which is preferred over incineration and landfill as per Basel Convention Technical Guidelines
- Has a dedicated team of professionals working to provide tailor-made services to help customers achieve their sustainability objectives
- Has access to 14 facilities across India and caters to the waste management needs of more than 25 industrial sectors
- Globally, Geocycle is present in over 60 countries with more than 10,000 customers and co-processes over 14 million tonnes of waste per annum
